Dear SoFi Bank,

I've been using SoFi for all my personal finance management since May 31st of this year, 2022. I wanted to create a joint checking account with my then fiance, now wife, to make it easier to manage our finances as a team. I was able to get signed up in minutes online, as opposed to scheduling a lengthy appointment at a local bank on a Saturday morning. I've since been an active user of SoFi's credit card (3% cash back!), crypto investing, stock investing, and Relay. While I love Relay, I personally still use TrueBill (now Rocket Money) - the notifications for bill increases are pretty great.

We recently bought a house, we used a local mortgage company that a local real estate agent recommended, but holy moly, they had sent us so many different emails with so many different things to do for the loan process, it was really obvious they needed a software app for this process. Their emails had nice elaborate formatting, though :)

I tell everyone I know to get a SoFi account, and I would be overjoyed to join the company and help carry on this culture of excellence.

Sincerely yours,

Devin Rhode
