

Devin Rhode, JavaScript Developer

About.me/DevinRhode2 • (218) 290-8275 • DevinRhode2@gmail.com

San Francisco Bay Area

JavaScript (ES6) • Ember.js • jQuery • Chrome, Safari, Opera Extensions • Scraping
Framing • Node.js • HTML5 • CSS3 • Animation • LESS, SASS, Stylus • Bootstrap
Foundation • Markdown • Documentation • Git • Grunt • PHP • Basic Ruby, Python

Work History

JavaScript Developer, Amobee • April 2013 - August 2013 (5 months)

Collaborated with C Engineers on a hybrid native/web ad SDK. Developed ads using their proprietary markup language. Made critical contributions to the markup language, resulting in faster development and less duplication.

Freelancing • June 2011 - March 2013 (1 year, 11 months)

I've written eleven chrome extensions that have been downloaded thousands of times.

- **Scout**, 10 months. Chrome extension that streamlines searching the web. Became very knowledgeable about javascript, css, web performance optimization, framing, and scraping. [1]
- **TrackIf.com**, 3 months. Designed and implemented initial versions of bookmarklet, Chrome and Safari extensions with code-sharing and live update capabilities.
- **VoteBox2012.com**, 3 months. Partnered with a designer and a developer to create this website from scratch using jQuery, PHP, Bootstrap, and Facebook Login.
- **HitMeUp**, 7 months. Built a team and developed this social media application for connecting with friends nearby. Used PHP, MySQL, SVN, Twilio and integrated with Facebook.
- **CribFrog**, 2 months. Collaborated with the founder of this startup to prototype the first version of a social application for residential tenants using PHP.
- **Refactr**, 2 months. Developed a chrome extension and bookmarklet to embed the functionality of their MileMarker product into the browser.

"I hired Devin to code a chrome extension that had a Facebook SDK integration component, and some non trivial script injection dependencies. Devin powered through the project in record time, and had a good sense for design and usability while doing the trickier coding parts. He is one of the most talented young coders I've ever met."

— Sergey Lossev, client

"Devin is a very rare type of person. He is the type of student who doesn't look for the grade in a class, but the experience and being able to take something away from it to apply in life."

— Ehsan Angadjivand, classmate

GitHub Highlights @DevinRhode2

- TraceKit.js, Popular library for cross-browser stack traces [2]
- extendFunction.js, Decorate functions in JavaScript [3]

Education

University of Minnesota, Duluth 2010-2011

Focus: Computer Science, Math

Operated my own computer repair service in high school.
